OpenStreetMap US
Organizational Membership

OpenStreetMap US is catalyzing collaboration between individuals, governments, private sector, education, and civic organizations.

Our Organization

Partners with organizations to advocate, communicate, or identify needs through crowdsourced open map data

Fosters relationships with stakeholders through data stewardship & technology development

Facilitates stakeholders to achieve broad-scale change in national data use and access alongside government agencies

Amplifies the work of local volunteer groups collaborating with national networks to bridge efforts & maximize impact

Your Membership

Demonstrates a commitment to the availability & quality of open geospatial data in the United States and OSM, the foundation of geospatial.

Connects you to a thriving community solving data gaps & developing innovative technology in open geospatial

Gives you access to a **growing professional network** collaborating across a diversity of sectors & industries

Expands your outreach through OpenStreetMap US communications, the State of the Map US conference, & more

Invests in the work of OpenStreetMap US to connect & convene community through OpenStreetMap

invest in our work today at openstreetmap.us

Programs Your Investment Supports

Organizational memberships support the programs, projects, and initiatives led by OpenStreetMap US, including:

DATA DEMOCRACY & INTEROPERABILITY

Developed in collaboration with federal partners, **PUBLIC DOMAIN MAP** is designed to multiply the power and impact of volunteer mappers contributing to the public good by combining crowdsourcing efforts.

RESPONSIBILE RECREATION

The **TRAIL STEWARDSHIP INITIATIVE** convenes a collaboration of government, volunteer, and private sector stakeholders working to address issues in trail mapping, outdoor recreation, and public land management across the nation.

CIVIC ENGAGEMENT AND SOCIAL IMPACT

Our **MAPPING FOR IMPACT** program builds partnerships with organizations and agencies focused on civic, social & environmental justice issues in the US to leverage OpenStreetMap data for their mission.

EDUCATION & WORKFORCE DEVELOPMENT

For over 10 years, **TEACHOSM** has empowered educators at all levels to integrate open source mapping and the OpenStreetMap ecosystem of tools in the classroom, fostering the next generation of geospatial leaders.

COMMUNITY INNOVATION & TECHNOLOGY

Through our **CHARTER PROJECT** program, we support, guide, and promote community built projects that further the mission and purpose of OpenStreetMap US, providing fiscal sponsorship and fundraising capabilities. Current projects include:

CONFERENCE SPONSORSHIP

Combine your membership with any tier-level sponsorship to one or both of our annual conferences for greater outreach and savings of up to 25% off regular sponsorship pricing.

STATE OF THE MAP US

Our annual flagship event brings together hundreds of enthusiasts in-person from private companies, humanitarian organizations, government agencies, academia, and the technology sector to learn new map technology and share ideas. Past sponsor tiers have included:

- Logo on event signage, social media, and event website
- Acknowledgement during opening address
- Exhibit space in priority location
- Advertising space in the conference program

Our virtual conference **Mapping USA** uniquely reaches members of the OpenStreetMap US and global community that otherwise would not be able to join an in-person conference. Past tiers have included:

- Logo on event website, agenda, virtual signage, social media
- Dedicated sponsor announcements to community & attendees

"Development Seed has benefitted for many years from the OpenStreetMap project as we build open-source and open data tools for partners around the world. We give back in many ways: Our Data Team in Ayacucho, Peru, has made significant mapping contributions and shared enhancements to mapping tools. We have a strong core of team members active in OSM and building open-source tools around the larger OSM ecosystem. We consider OSM US our 'home' chapter, and you can frequently find our team members at State of the Map US. We are excited about the great initiatives that have come out of OSM US over the past couple of years, with Executive Director Maggie Cawley stewarding the organization forward. Supporting OSM US through an organizational membership is another way we can give that has a material impact. We want to encourage other organizations, especially businesses who benefit from OpenStreetMap, to take their commitment a step further and join us as an organizational member."
---Development Seed

"The origins of Mapbox are intertwined with OpenStreetMap and the communities around it. We're honored to formalize our ongoing relationship as a supporting organizational member of OpenStreetMap US, our 'home' chapter, and we look forward to ongoing collaboration across the entire OSM ecosystem"
---Mapbox

"We are proud to officially partner with OpenStreetMap US so we can build a precise digital map to help people recreate responsibly, protect our natural areas, and empower people to explore safely."
---AllTrails
